PRODUCT DESCRIPTION

Magner's Self-Service Coin Center CDS 909 will provide you with a product you can really count on to minimize the involvement of your tellers in handling coin transactions and provide the lowest total cost of ownership over the equipment's useful life.

Self Service Coin Center Benefits Include:

Input Console:

An easy-to-read and understand four-line (20 characters per line) backlit LCD display provides customer prompting through the entire transaction, with instructions in English or Spanish, plus error status messaging.

User friendly two-button operation with illuminated green and red buttons.

Automatic coin feeding mechanism ensures optimum feeding of coins and eliminates the need for customers to manually "scrape or push" coins into the machine, reducing chance of customer injury.

Coin Counting and Sorting Section:

Coins are counted utilizing advanced alloy smart sensor technology which automatically rejects mutilated coins, foreign coins and slugs during the counting process, rejected coins are returned to the customer.

Patented automatic debris ejection system removes non-coin material and debris after each customer transaction, routing it to a trash receptacle.

Continuous cleaning mechanism removes sand, pebbles and other small objects.

Counts all six U.S. coin denominations, $.01, $.05, $.10, $.25, $.50 and $1 (SBA/Golden), programmable for up to 20 denominations including foreign coins and tokens.

Key lock controls access to counter/sorter section, paper roll and coin bagging section.

"Pull-out" shelf design allows easy access to counting/sorting section for routine service and cleaning.

The cabinet was designed for acoustical insulation plus noise-reducing materials in sorting and bagging sections provides the quietest operation available.

Optional Additions:

Custom Colors Wraps
Custom Enclosures
Signage and Graphics
Ten-Key Pad
Magnetic Card Reader
RS232 Interface and Host
Communication Software
Rear Access Model with Keyboard, Display and Printer

Bag Management Section:

Full access to the bagging section from the front of the machine for easy bag changeover.

Coin outlets for fully sorted coin accommodate direct output into nine coin bags. Bag dividers and the cabinet's ground level bag positioning allow easy removal of full bags.

Bag stops are fully programmable, exact, and can be set for either pieces or weight.

Receipt and Report Output:

High-speed thermal receipt printer uses security paper with special top coating and UV-reactive ink to deter amount alterations or fraudulent receipt duplication.

Easy to read receipt can be customized with name, address, etc., of organization.

Dual service fee percentages are fully programmable.

Grand totals of pieces and value are accumulated by denomination.

Summary report indicates full breakdown of coins processed.

Transaction log recaps all customer transactions.
