

REVOLUTION®

2000 / 4000

REVOLUTION

Revolution Retail Systems LLC offers a fully automated cash management and recycling solution, freeing management's time from back office tasks to front end Customer Service. The Revolution® is the first complete (notes and coins) cash automation and recycling system built specifically for the large volume retailer. Only Revolution automates all three functions of cash management required by a retailer:

- 1) Till management (beginning of shift and end of shift drawer preparation)
- 2) POS balancing to the back room
- 3) Deposit preparation

Cashiers can start their shift by creating their own till, or end their shift by checking their own till in. This automation of a manual process creates operational efficiencies that result in reduced Full Time Equivalent (FTE) hours in the store. Balancing cash registers with the POS server is made easier with the Revolution, resulting in reduced cash variation and shortages due to by-register and by-cashier accountability. And finally, by more effectively managing the daily deposit, retailers save time and reduce the change fund required (because so much cash is now being recycled). Revolution Retail Systems LLC has truly "Revolutionized" the Cash Room.

2000 / 4000

SPECIFICATIONS:

- Weight:** 2050 lbs. (930 kg) Standard Security Note Vault
2450 lbs. (1110 kg) High Security Note Vault
- Height:** 45.96" (1167 mm) Top of Coin Platform
64.26" (1632 mm) Overall
- Width:** 54.50" (1384 mm)
- Depth:** 39.10" (993 mm)

Unit must be secured to a level floor.

HARDWARE FEATURES:

- Closed Loop Architecture of Notes and Coins. No Manual Intervention Required.
- Coin Discrimination (i.e., Counterfeit Coin Rejection)
- Volume - Up to 16,000 Note Capacity
- 39,400 Coin Capacity
- Continual 24/7 Malfunction Monitoring
- Lockable Deposit Cassette
- "Fitness Sort" on Recycled Notes
- Scalable Platform
